

Supplying Cleveland Clinic with High Quality Chinese Herbal Formulas

TCMzone, LLC. Becomes A Supplier to Cleveland Clinic's Wellness Institute

Tempe, AZ, Feb 9, 2018. TCMzone, LLC. is pleased to announce that their brands of practitioner-only granule herbal formulas are now being dispensed at Cleveland Clinic' Wellness Institute. The TCMzone® and Honso® brand granule herb formulas in their signature unit-dose packet forms are now being made available to patients at the world class leading hospital.

As a granule herbal medicine supplier for almost 20 years, TCMzone, LLC. has built its company and reputation by providing high quality, scientifically validated granule herbs to US healthcare practitioners. TCMzone's innovative delivery dosage forms have made Chinese herbal medicine easy to administer, creating high patient compliance. The company's mission is to expand the use of herbs for wider patient reach within more mainstream healthcare institutions including schools and hospitals.

Cleveland Clinic is one of the largest, most well-respected hospitals in the U.S., seeing more than 7 million outpatients visits a year. Cleveland Clinic also shares a dedication to addressing the increasing demand for integrative healthcare by researching and providing access to practices that address the physical as well as lifestyle, emotional and spiritual needs of patients. This is recognized in their establishment of their Wellness Institute in June 2007, combining world class medical care with quality wellness programs along with supplying a variety of integrative healthcare products, now including TCMzone® and Honso® granule herbal products through their Wellness Store.

TCMzone granule herb formulas are the first Chinese herbal medicine to be stocked and sold direct, on-site at Cleveland Clinic. Patients see their healthcare practitioner at Cleveland Clinic, receive their herbal prescription from their practitioners and walk into the Wellness Store to receive their recommended herbal formula(s), all in one visit. This approach will significantly improve the patients experiences with Chinese herbal medicine.

TCMzone signature herbal dosage form in their sealed, individual-dose packet allows for accurate quality control, elimination of any contaminations due to opening containers. Each dose of the TCMzone® and Honso® granules are sealed, with formula name and code listed on the packet. In addition to the obvious convenience benefits of these packets, they also allow for a lower daily dose, assisting with increased compliance.

In addition to supplying herbal formulas to Cleveland Clinic's Wellness Institute, TCMzone, LLC. also provides other leading hospitals with quality Chinese herbs such as Christus St. Vincent Regional Medical Center in Santa Fe, NM and top educational institutions including Pacific College of Oriental Medicine in San Diego, New York and Chicago, Bastyr University Center for Natural Health in Seattle, Acupuncture & Integrative Medicine College in Berkeley CA and New England School of Acupuncture in Boston.
